Forecast for Monday 23 Sep 2024

Weather: Overcast with persistent rain for much of the day, accompanied by extensive low cloud, mist and hill fog. Rain turning heavy at times before turning patchier later in the day, though remaining cloudy alongside an ongoing risk of drizzle.

Chance of cloud-free hill tops above 600m: Less than 5%.

Low cloud and visibility: Widespread low cloud with bases dropping around 300-400m through much of the day, resulting in periods of hill fog, reducing visibility. Heavy downpours of rain will further reduce visibility and clarity across scenic viewpoints of the park.

Meteorologist's View

Some challenging and perhaps dangerous conditions, with swollen water courses. Navigational skills and waterproofs essential.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 23 Sep 2024	10.6mm	21.2mm	21.6mm

Forecast for Tuesday 24 Sep 2024

Weather: A drier and brighter day compared to Monday. Some patchy low cloud possible to start, with some hill fog in places, though this generally lifting and breaking through the morning allowing some bright and sunny spells to develop, particularly by the afternoon. Although much of the park will remain dry, there is a chance of the odd light shower. Feeling fresher and not as humid as recent days.

Maximum wind: Northwesterly 15-20 mph, gusting 25 mph.

Chance of cloud-free hill tops 600m: 40% rising to 80% from midday.

Low cloud and visibility: Some low cloud around 400-500m to start, this covering hill tops at times creating hill fog, though this lifting and breaking fairly quickly through the morning, allowing generally good visibility through the afternoon outside of showers.

Temperature: **Valleys:** Plus 8 Celsius, rising to plus 15 Celsius
At 600m: Plus 7 Celsius, rising to plus 9 Celsius.
Freezing level: Above summits.
